

INTEGRATED OFFSHORE ENGINEERING/INSTALLATION SUPPORT

At SINACO, we understand the nature of the business: massive mobilization of work forces and vessels are often seen in the engineering/installation works. Our attention shifts accordingly to cater for the challenges in such work. With our vast hands-on experiences in various projects, our services are always delivered beyond our customer's expectation.

In addition to our services available for Offshore Drilling Logistic Support, below services are also available especially for your offshore engineering/installation needs:

- Assembly / Commissioning Yard With Full Facilities
In Strategic Locations
- Supply of Self-Propelled Modular Transporter
- Welder, Fitter & General Worker In Selected Locations
- Waste Management Including Hazardous Waste
- Module Transportation Related
Engineering Calculation
